# ARAL3D

*Spectral Earth of the Aral Sea*

---

A free public 3D platform — educational game + GIS-like explore tool.

a r a l 3 d . c o m

Aral3D turns the Aral Sea basin into an interactive educational, cultural, and museum-ready environment — free and public.

# What water is.

*Not where water is. Not how much. Not how it flows or evaporates —  
but what water is imagined to be. Because what we imagine water to be  
defines how we engage with it.*

# Two scales.

# The map has limits.

*We don't reject maps —  
we hack them, stress them,  
and explore their limits.*

A line makes a river feel like a pipe — it starts here, ends there. But rivers leak and absorb. They are the mud and silt they carry, the mosquitos and fishermen, the children swimming, the willows growing.

# Two modes.

## 0 1 — G A M E

### Educational levels

Missions, characters, voxel worlds, satellite GeoGuessr, ministry sims. For schools, museums and festivals.

## 0 2 — E X P L O R E

### GIS-like data tool

Real DEMs, historical basins, demographics, climate, water extent timeline. Shareable URLs, exportable views.
