

INTRO
ARAL3D

THE ARAL SEA
a playable aral sea

a public 3D platform for learning, memory, and environmental imagination

C H A P T E R 1
W H A T I T I S

one browser, one basin

Aral3D is a browser-based 3D platform about the Aral Sea region.

It combines maps, terrain, stories, environmental data, and interactive scenarios into one public learning tool — for schools, museums, festivals, and cultural institutions.

CHAPTER 2
WHY THE ARAL SEA

more than a disappearing sea

The Aral Sea is one of the most important environmental stories of the region.

But it is not only about a vanishing sea — it is about water, health, infrastructure, agriculture, memory, climate, borders, and future choices. Aral3D helps people see these layers together.

C H A P T E R 3
T H E P R O B L E M

flat maps, distant stories

Most people meet the Aral Sea through flat maps, old photographs, statistics, or disaster narratives — important, but distant.

Aral3D makes the region spatial, interactive, and easier to understand. Instead of only reading about change, users can move through it, test scenarios, and ask questions.

CHAPTER 4
CORE PHILOSOPHY

maps are not neutral

The way we imagine water affects the way we treat it.

Water can appear as a resource, a border, a memory, a health issue, an infrastructure system, a political question, or a shared future. Aral3D turns the map into a space for learning, questioning, and imagination.

CHAPTER 5

WHAT IT DOES

CHAPTER 6

CURRENT STATUS

CHAPTER 7
FIRST PUBLIC USES

where it lands first

- 01** Aral Culture Summit 2026
- 02** Savitsky Museum
- 03** History and Aral Sea Museum
- 04** Center for Contemporary Art, Tashkent
- 05** Schools and educational programs
- 06** Public workshops and festivals

CHAPTER 8
EDUCATION POTENTIAL

a tool for classrooms

Geography

How water systems work and how landscapes change.

Ecology

How human decisions shape fragile ecosystems.

History

Memory of a region told through its terrain.

Design

Visual literacy for maps, data, and storytelling.

Civics

Shared decisions about water, land, and future.

installation, archive, speculation

- 01** Tashkent Design Week
- 02** Milan Design Week
- 03** Venice Architecture Biennale
- 04** Venice Art Biennale

CHAPTER 10
INSTITUTIONAL MODEL

free, by default

for schools, museums, researchers, and the public

CORE SUPPORT

Ministries, museums, schools, cultural foundations, environmental organisations, and international institutions.

OPTIONAL

Paid adaptations for private museums, festivals, educational centres, and commissioned exhibitions.

from prototype to platform

\$30,000

for the first 6 months

polish, learning materials, audience testing, museum & festival formats

\$50,000

per year, 3-year phase

maintain the platform, expand content, support workshops, keep it free

CHAPTER 12
FIRST 6 MONTHS

six months, one public version

Polish

Product and user experience.

Demo

A presentable public version.

Materials

Educational content for classrooms.

Testing

With students, teachers, museum audiences.

Formats

Festival and exhibition adaptations.

Partners

Institutional partnerships and documentation.

CHAPTER 13
THREE-YEAR VISION

a living public platform

Over three years Aral3D can grow into a long-term public platform for the Aral Sea region.

New layers, new stories, new educational modules and installations — a learning tool and a cultural archive that stays alive, updates over time, and remains accessible.

CHAPTER 14
EXPANSION POTENTIAL

aral is the first case

- 01** Caspian Sea
- 02** Venice
- 03** River deltas
- 04** Drylands
- 05** Irrigation landscapes
- 06** Other climate-affected regions

the prototype is already alive

Environmental education needs better tools. Museums and schools need formats that are visual, interactive, and accessible.

The Aral Sea story needs to be told not only as a past disaster, but as a living question about the future. With support, Aral3D moves from prototype to public platform.
